Policy for energy efficiency behind the implementation of the Directive 2012/27/EU: best practices and outlook to 2030

September 24 2014
European Parliament (A3H-1)

The European Commission in 2012 have launched the Directive 2012/27/EU on Energy Efficiency. Two years after its launch is time to make a situation point also in view of the 2030 recently revised targets. The event will represent the occasion for an open discussion with European Commission Representatives on the matter and will include political views from EP representatives as well as a focus on a Best Practice implementation case from Italy.
